-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Claims 15-17 have been withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 10/18/04.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Leek in view of Forsmo, Shafer, or Cannon et al.

Leek discloses a flying object with first and second fins 11 (which do not rotate beyond pre-set angles) being housed in housings (that are positioned at a first pre-set angle) and can be rotated at desired angles. The fins are rotated in opposite directions. Motors 24 (which is connected to electronic controllers) with gears are used to rotate the fins. Leek is silent on the guidance computer that has means to determine corrective angles. However, Forsmo, Shafer, or Cannon et al teaches that means to determine corrective angles to control the fins so that it performed as desired so that the flying object reaches its destination are well known in the art.

It would have been obvious to one skilled in the art at the time the invention was made to have used means to determine corrective angles in Leek's system as taught by Forsmo, Shafer, or Cannon et al to allow the flying object to reach its destination correctly.

Allowable Subject Matter

Claims 8-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Pijaca et al, Pellegrini et al, Burke et al, Guthrie et al, and Trulin et al disclose aircraft control means.
